

Stokman Angus

YEARLING BULL AND HEIFER SALE

Wednesday 20 September 2023 1 p.m.

100 Bulls and 40 Heifers Sell

1708 Te Kopia Road, Waikite Valley, Rotorua

Welcome to Stokman Angus

We extend a sincere invitation to join us at our 14th annual yearling sale on Wednesday, September 20th.

Angus cattle have been in our history for over 100 years, with Sherrie's family ranch, Sitz Angus, reaching the milestone of 100 years producing Angus bulls in Montana. For us, raising cattle is a way of life we enjoy, but we also take it very seriously. The bulls you purchase today are an investment in genetic progress in your herd, and for you to get the most potential out of your investment, we work hard to provide the most accurate data we can. We start by HD50K dna testing every registered calf born on the farm. We docility score at weaning. Finally, we carcass scan and fertility test every sale bull to provide the product you see today.

We strongly believe in selling yearling bulls, as besides getting faster genetic gain since you can introduce newer genetics into your herd a year earlier, yearlings are usually fitter and more agile, haven't got all that extra weight and are less prone to injury. They are also much better value for money, as with R2 Angus bulls averaging over \$9500 this year in the autumn sales, yearlings are much more affordable. In our 2022 sale, we averaged \$5700 on 100 bulls, but there were 40% of the bulls that sold for between \$2200 and \$4000. The bulls are well grown and will average 500 kgs on sale day, so are suitable for both heifers and cows.

The 110 bulls in this catalogue are the most uniform group we have raised, and are sired by some of the leading bulls in the Angus breed, and we are very proud to present them. We value temperament, and have had amazing feedback on how easy our bulls are to work and handle.

The 40 heifers have been selected from the registered herd, but sell without transfer. They share the same sires as the bulls, and will sell in pens of 10. Ebv's and Indexes will be available on each pen sale day.

We have continued to thrive in our relationship with Angus Australia, and they are continuously developing new EBV's and indexes, that will improve our cattle selection. If you have problems accessing our data on Angus Australia, please don't hesitate to give us a call so we can help.

Thanks to Craig and Courtney Moyes who have been with us for six years, and are a very important part of our team. Craig and Jake work together very well, and this has given Mark time to be able to achieve all those little jobs that keep things running smooth. If you enjoy the native gardens at the salebarn, Courtney keeps things looking stunning. And we are overjoyed that Jake and Lexie are engaged, and are looking forward to a big wedding in the salebarn sometime in the future. Lexie is full time employed with the Govt Apprenticeship program, but is always there to help Jake on her days off, and we appreciate it and that she loves the farming life.

We look forward to seeing you on September 20th. If we can be of any assistance, please let us know. The coffee pot is always on if you are over our way.

14th ANNUAL YEARLING SALE

Wednesday 20 September 2023

At the farm - 1708 Te Kopia Road --- 1pm --- Waikite Valley, Rotorua

FOR SALE:

100 Yearling Angus Bulls | 40 Yearling Commercial Angus Heifers

~ Morning tea and lunch provided ~

Inspection of Bulls from 10:30am on sale day or prior with arrangement.

Catalogue can be viewed online at **Stokman Angus Farm** on our website,
on Stokman Angus on facebook or Angus Pro.co.nz

BBSE - Bull Fertility Evaluation.

The bulls in this catalogue have met the following parameters that are required to pass a Bull Breeding Soundness Evaluation for Fertility testing carried out on behalf of Stokman Angus on 29th and 30th August 2023.

Penile Soundness Each Bulls extended penis is examined for structural soundness, injuries and abnormalities.

Semen Each bull's ejaculate is examined microscopically by a certified Morphologist. The semen is tested for motility and morphology and must pass the minimum standards for 75 % normal semen at the time of testing.

Signed

Guy Haynes
Bovine Reproductive Consultant

ARTIFICIAL BREEDING SPECIALISTS
Tararua Breeding Centre is a wholly owned subsidiary of Today's Ag Ltd.

The next group of "Boys" waiting for their turn to be tested.

Lucas Reina, our new bull fertility testing specialist!

Stokman Solution S329 was one of the most talked about bulls sold in the 2022 Spring Bull sale season. Sired by Sitz Resilient, Solution was retained in herd, with an Australian semen interest selling to Mandayan Angus for \$55,000 as a yearling. Solution ticks all the boxes, and is in the top 1% in the breed for Calving Ease, Gestation Length, Angus Pro and Angus Breeding Indexes, and is a true curve bender with EBV's from +.2 birthweight to +125 600 weight, very good phenotype, with excellent carcass and structure. We are very excited about what he will bring to our program, and will have his first calves in the sale next year!

Stokman Stellar S346 was the other young bull we chose to retain in 2022, and he has very similar figures to Solution. He has a bit more growth than Solution, very high fats, and also is in the top 1% for his Angus Pro and Angus Breeding Indexes. With the maternal strength of their sires, Stellar and Resilient, we will be looking forward to the females that will be coming into our herd from these two outstanding bulls.

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals recorded with Angus Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Calving Ease	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
	RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.
Selection Index	\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	\$PRO	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd based in New Zealand that targets the production of grass finished steers for the AngusPure programme. Steers are assumed marketed at approximately 530 kg live weight (290 kg carcass weight with 10 mm P8 fat depth) at 20 months of age, with a significant premium for steers that exhibit superior marbling.	Higher selection indexes indicate greater profitability.

Thanks to our VetPlus vets, Karl Weaver and Kyle Kannan for the quality work and advice we get from you. You are a very important part of our team.

Bringing your new bull home

ARRIVAL

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows.

MATING NEW YOUNG BULLS

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows.

Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

When the young bulls are working, inspect them regularly and closely.

MATING NEW YOUNG BULLS

Older working bulls also need special care and attention before mating starts. They should be tested or checked

every year for physical soundness, testicle tone, and serving capacity or ability.

All bulls to be used must be free-moving, active and in good condition. Working bulls may need supplementary feeding before the joining season to bring up condition.

DURING MATING

- Check bulls at least twice each week for the first 2 months. Get up close to them and watch each bull walk; check for swellings around the sheath and for lameness.
- Have a spare bull or bulls available to replace any that break down. Replace any suspect bull immediately.
- Rotate bulls in single-sire groups to make sure that any bull infertility is covered. Single-sire joining works well but it has risks. The bulls must be checked regularly and carefully, or the bulls should be rotated every one or two cycles.

Bulls are a large investment for breeding herds and they have a major effect on herd fertility. A little time and attention to make sure they are fit, free from disease and actively working is well worthwhile.

We use Multimin, an important part of our animal health with newborn calves and getting our bulls ready for fertility testing.

Cam and Becca have headed off to America for 5 months so won't be at the sale this year, but will be with us in spirit!

FOR YOUR INFORMATION

CONDITIONS OF SALE

1. The sale will be conducted under the usual conditions of NZ Stock Station Agents Association.
2. All intending purchasers are required to register at the sales office prior to the sale.
3. A rebate of 5% will be paid to non-participating livestock companies and agents with approved credit facilities to introduce and/or accompany buyers to the sale. Arrangements must be made with the auctioneer prior to the sale, and settlement made on the buyers behalf within 14 days of sale.
4. This sale will be conducted purchased price plus gst.
5. Each lot shall be at the risk of the purchaser at the fall of the hammer.
6. Retained Interest – Stokman Angus retains a 30% semen share and 30% share of any semen sold on all bulls sold at the sale.
7. Any bull sold requiring a transfer for use in a registered herd will be at a minimum price of \$15,000 plus gst. The purchaser or agent must state at the fall of the hammer if a transfer is required. For any animal transferred to Angus NZ members, the cost of all fees and genetic tests charge by Angus NZ to import and register the bull from the Australian database will be shared equally between the purchaser and the vendor.
8. All cattle become the purchaser's responsibility at the fall of the hammer. They are automatically insured for 14 days through the FMG Premier Bull Insurance Coverage, and we do recommend you talk to the FMG team about purchasing the additional 50-week insurance for your peace of mind.
9. Purchasers are requested to please completely fill out the Purchasers instruction Slip at the back of the catalogue, and hand it to the PGG staff at the end of the sale. **Everyone that fills it out COMPLETELY goes into a draw for a tub of Crystalyx.**

Health Status – Stokman Angus has a C10 status.

Bulls – BVD Negative, BVD, Lepto and Covexin vaccinated

Heifers – Lepto and Covexin vaccinated

All animals will get an abamectin drench prior to the sale.

All bulls in this sale are free of known genetic disorders. They are AM, NH, CA and DD Free or Free Untested.

Trucking - We will organize the trucks to deliver the bulls at the buyers expense, and will work to organize them as efficiently and least costly as we can.

OSH – Every effort will be taken by us, our staff to ensure the safety of attending buyers and visitors. However, cattle can be unpredictable, particularly if stressed, mobbed up or in a new environment. Please exercise all reasonable care and attention when viewing the cattle.

HEALTH AND SAFETY

Complying with the Health and Safety in Employment Act 1992 and Health and Safety at Work Act 2015 we are required to advise people of possible hazards. Please be aware of these prior to entering the property to ensure your personal safety.

- Cattle can be unpredictable, especially toward children.
- No children under the age of 15 allowed in the inspection yards.
- Move quietly, be vigilant at all times.
- Wear appropriate footwear and be careful of slippery surfaces.
- Be aware of vehicles and machinery.
- All possible care has been taken in arranging the sale seating, but caution in attaining your seat is still necessary.
- All footwear is to be rinsed in available disinfectant when arriving on the farm.
- Thank you very much for your cooperation! We hope you enjoy the day.

This sale will be hosted by bidr[®] (bidr.co.nz) as a HYBRID ON-FARM auction, with online bidding and a live-stream available for online purchasers.

All intending online purchasers must register with bidr[®] using an account held with one of the bidr[®] partner agencies in advance of the sale date.

The bidr[®] team is available to assist intending purchasers with signing up and registering – please call 0800 TO BIDR (0800 86 2437), or email enquiries@bidr.co.nz for assistance at any point.

Alternatively, contact your local bidr[®] representative:

Fully Loaded was the high selling bull in Storth Oaks 2020 sale, and is a calving ease specialist. His calves come early and he is in the top 1% for gestation length, but in top 26% for 600 day growth. We have just leased him to ST Genetics to be their premier beef bull to use in the dairy industry, due to his all around excellent EBVs.

Genetic Conditions: AMF,CAF,DDF,NHF,DWF,MAF,MHF,OHF,OSF,RGF
 Statistics: Number of Herds: 14, Prog Analysed: 202, Genomic Prog: 123

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

- PV : both parents have been verified by DNA
- SV : the sire has been verified by DNA
- DV : the dam has been verified by DNA
- # : DNA verification has not been conducted
- E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

YARDS AHEAD IN SAFETY & EFFICIENCY

"It just works so well"

"Anybody can do the job here, it just works so well. It's got gates that slam closed and stay closed, you want people to be behind gates and be safe. One person can do the job and they're never pressured."

Mark Stokman

40 Yearling Commercial Angus Heifers

Stokman Angus offers a unique opportunity to purchase quality replacement heifers with similar breeding to the bulls offered in the sale. These heifers are an investment for the future.

40 heifers have been selected out of our registered 2021 heifers, and they sell without transfer. They will be sorted into lots of 10 head and we will help arrange trucking for the heifers at the purchasers expense.

AVERAGE EBV'S ON 40 SALE HEIFERS

In 2012 Angus NZ developed the Milestone Dam Program to recognize longevity and superior reproductive and maternal performance in NZ Angus. Less than .5% of the Angus pedigree cows in the whole of NZ met the criteria to achieve the Milestone Dam Award. Out of the 64 cows total in NZ to qualify, 8 of them were from the Stokman herd. We continue to select herd and AI bulls that excel in the maternal and fertility traits.

YOU CAN RELY ON FMG TO STAND BY YOU. LITERALLY.

A bull is a big investment. Which is why FMG is right there with you to ensure you get the very best cover on sale day, and the best service every day after that. That's because we understand livestock insurance as much as we understand the importance of personal service. So talk to your FMG Rural Manager about FMG Premier Bull Sales cover. All bulls sold at auction can be covered for 6.5% of the purchase price and those sold at FMG premier sales are insured at the fall of the hammer for 14 days free.* To find out more, call us on 0800 366 466 or visit fmg.co.nz/bulls

* Subject to standard underwriting criteria, up to the value of \$50,000. Please note this is only a summary of FMG products and services and is subject to our specific product documentation. For full details, refer to the relevant policy wordings at fmg.co.nz

We're here for the good of the country.

FMG
Advice & Insurance

Premier Bull cover

What is Premier Bull cover?

All bulls auctioned at this sale up to the value of \$50,000 will automatically be covered under FMG's Premier Bull cover for 14 days at no cost to the purchaser.

Length of cover

To extend cover for the specified bull beyond 14 days you need to tick Premier Bull cover 12 months on the Purchaser Instruction and Insurance Slip in this catalogue. The specified bull is then covered for the remaining period of 12 months. The premium is payable to FMG and is in addition to the purchase price of the bull.

If you require an alternative cover period talk to an FMG representative.

Your bull's value

Any bull covered under this policy must be purchased for \$50,000 or less. For any bull purchased over \$50,000 talk to an FMG representative.

During the period of insurance, the specified animal is covered for:

- Death or infertility as a result of accident, disease or illness.
- Transit.
- Theft.

What we will pay

Fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

Google Maps: Stokman Angus sale Barn

Join us for an award winning Lake Man beer after the sale. James and Ellisa Cooper, who started the Lake Man legacy at his farm north of Lake Taupo has been a part of our sale from the beginning.

NOT ALL BULLS ARE CREATED EQUAL

Check what TRAITS OBSERVED are listed in the sale catalogs you are looking at. If the traits are not listed, no raw data has been submitted to the Associations. We invest in inputting complete info so our info is as accurate as possible for our customer.

WHAT KEEPS YOU PROFITABLE IN THE CATTLE BUSINESS TODAY?

IT ALL STARTS HERE!

Accurate birthweights and HD50K tissue samples are taken daily during calving, and having quiet attentive cows make weighing and tagging the calves a pleasure.

See you at the sale!
